Notes to Condensed Consolidated Interim Financial Statements

1. ENERGO - PRO a.s. Group and its operations

ENERGO - PRO a.s. (“EPas”) is a joint-stock company (“the Company”) established on 23 March 1995. The registered address is Na poříčí 1079/3a, Nové Město, 110 00 Praha 1, Czech Republic, and the identification number of EPas is 63217783. The main activities of the ENERGO - PRO a.s. are power generation from hydro power plants (“HPPs”), electricity distribution and power trading.

The ultimate holder of 100% of ENERGO-PRO a.s. shares is the entity DK Holding Investments, s.r.o. (“DKHI”) which is wholly owned by Mr. Jaromír Tesař.

The Group has established solid presence in Central and Eastern Europe, Black Sea region and the Caucasus:

- Hydro power operations in Bulgaria, Georgia and Turkey;
- Power distribution activities in Georgia and Bulgaria;
- Trading with the electricity on the European market.

EPas is the parent company of the Group of companies (“the EP Group” or “the Group”), which comprises the following entities and their subsidiaries consolidated in these financial statements as of 30 September 2022:

Name	Location	Ownership interest
ENERGO - PRO a.s.	Czechia	parent
MEGAWATT SERVIS s.r.o.	Czechia	100%
TDP Development Services s.r.o.	Czechia	100%
ENERGO-PRO Georgia Holding JSC	Georgia	100%
OPPA JSC	Georgia	100%
ENERGO-PRO Bulgaria EAD	Bulgaria	100%
ENERGO-PRO Varna EAD	Bulgaria	100%
ENERGO PRO İnşaat Şanyı ve Ticaret A.Ş.	Turkey	100%
Energo Pro Turkey Holding A.Ş.	Turkey	100%
ENERGO-PRO Swiss GmbH	Switzerland	100%
ENERGO-PRO Colombia S.A.S.	Colombia	100%

The Group is organised and managed based on territory markets in which it operates (Bulgaria, Georgia, Turkey, Colombia and international power trading). The Group’s business is conducted responsibly in order to achieve a solid financial return balanced with long-term growth and to fulfill the Group commitments to the community and the environment.

The Group has proven operational experience and know-how. The Group successfully implemented large-scale rehabilitation projects in the last years. From electricity distribution, the Group possesses know-how in dealing with large numbers of customers, network planning and optimization. In power trading, the Group has solid experience in cross-border electricity trading and execution of large-scale trade contracts.

The Group has had exponential growth during the past several years and turned into a strong player in the acquisition and operation of plants above 100 megawatts (MW) of installed capacity. The Group continues to look for new investment opportunities, focusing on South-Eastern Europe, the Black Sea region and South America.

The number of employees of the Group as of 30 September 2022 and 31 December 2021 was 9,131 and 9,152 respectively.

List of Group's power plants as of 30 September 2022 is as follows:

Hydro power plants	Installed capacity (MW)
Bulgaria:	
Koprinka	7
Stara Zagora	22
Popina Laka	22

Subsidiaries

ENERGO-PRO Georgia Holding JSC (“EPGH”)

EPGH was incorporated on 15 April 2021 and is domiciled in Georgia. EPGH is a joint-stock company limited by shares and was set up in accordance with Georgian legislation.

EPGH’s establishment was related to legal unbundling of the Georgian energy market and activities of EP Group in Georgia. The aim of the Georgian energy reforms is the creation of a market with high standards of public service and consumer protection that allows customers to freely choose their suppliers. In the first quarter of 2022, the liberalization of the Georgian energy market continued.

EPGH’s registered address is Zurab Anjaparidze st. 19, 0186 Tbilisi, Georgia. EPGH’s principal business activity is holding of shares in its subsidiary companies.

EPGH is the parent company of the group of companies (“EPGH Group”), which comprises the following entities and their subsidiaries consolidated in these financial statements:

Name	Location	EPGH’s ownership interest	
		30 September 2022	31 December 2021
JSC Energo - Pro Georgia (i)	Georgia	49.9%	49.9%
EP Georgia Supply JSC	Georgia	100.0%	100.0%
EP Georgia Generation JSC (ii)	Georgia	49.9%	49.9%

- (i) EPas owns 50.1% of share of the company JSC Energo - Pro Georgia.
- (ii) EPas owns 50.1% of share of the company EP Georgia Generation JSC.

JSC Energo - Pro Georgia (“EPG”) was incorporated on 31 July 2006 and is domiciled in Georgia. EPG is a joint-stock company limited by shares and was set up in accordance with the Georgian legislation.

On 5 February 2007, EPG signed an agreement with the Government of Georgia for the purchase of the assets of the hydro power plants and electricity distribution companies and obtained 100% control over the assets of United Energy Distribution Company, Adjara Energy Distribution Company and six hydro power plants in Georgia.

The investment project of the Group in Georgia was implemented with the financial support of the Czech Export Bank (a state-owned Czech financial institution which is specialized in providing support for export activities and foreign investments of Czech companies) until the issuance of the bonds in 2017.

EPG operates electricity distribution business. According to the requirements of the new Law on Energy and Water Supply, the distribution system operator carried out second step to legal unbundling by 16 April 2021 and separated distribution activities from supply business activities (until 1 July 2021 EPG conducted both distribution and supply activities to its end customers).

EPG’s principal business activity is the distribution of electricity to more than one million customers. EPG’s distribution network covers 85% of the territory of Georgia except for the capital city Tbilisi.

EPG’s registered address is No.19 Zurab Anjaparidze Str. 0186 Tbilisi, Georgia.

EP Georgia Supply JSC (“EPGS”) was incorporated on 14 May 2021 and is domiciled in Georgia. EPGS is a joint-stock company limited by shares and was set up in accordance with the Georgian legislation. EPGS’s principal activity is supply of electricity (following the legal unbundling of the Georgian electricity market). EPGS’s registered address is Zurab Anjaparidze st. 19, 0186 Tbilisi, Georgia.

EP Georgia Generation JSC (“EPGG”) was incorporated on 23 December 2016 after the reorganization of EPG assets and is domiciled in Georgia. EPGG is a joint-stock company limited by shares and was set up in accordance with the Georgian legislation.

EPGG’s principal activity is the generation of electricity via its portfolio of fifteen medium and small size hydro power plants.

EPGG’s registered address is Zurab Anjaparidze st. 19, 0186 Tbilisi, Georgia.

EPGG is the parent company in the following entity:

Name	Location	EPGG’s ownership interest	
		30 September 2022	31 December 2021
LLC gPower	Georgia	100%	100%

LLC gPower (“gPower”) was incorporated on 16 November 2010 and is domiciled in Georgia. As part of the legal unbundling changes in Georgia described above, the company gPower was transferred under EPGG in April 2021. gPower’s operating assets mainly comprise four gas power turbines with an installed capacity of 110 MW and other assets required for electricity generation (Gas Turbine Power Station).

gPower’s principal business activity is provision of guaranteed capacity and generation of electricity. Guaranteed capacity ensures the stable and reliable functioning of a unified electric energy system of Georgia. The period of standby mode and minimum volume of guaranteed capacity is regulated by the Government of Georgia. At the same time, tariffs are determined by Georgian National Energy and Water Supply Regulatory Commission (“GNERC”).

gPower’s registered address is No.19 Zurab Anjaparidze Str. 0186 Tbilisi, Georgia.

The number of employees of EPGH Group as of 30 September 2022 and 31 December 2021 was 6,044 and 6,094, respectively.

JSC OPPA (“OPPA”)

OPPA is a joint stock company and was established on 19 March 2007.

OPPA provides a variety of services to companies, commercial establishments and consumers. Such services include maintenance of pay boxes, pay lines, connection of windows based and java terminals and other related services.

OPPA is parent company of the following entity:

Name	Location	OPPA’s ownership interest	
		30 September 2022	31 December 2021
TESO TECH SOLUTIONS JSC	Georgia	100%	100%

OPPA established a subsidiary company LLC OPPA Commerce in September 2018. In July 2022, the company changed its name to TESA TECH SOLUTIONS (“TESA TECH”). Its main activity is optimization of commercial activities of OPPA. The registered address of TESA TECH is 15 Al. Kazbegi Ave., 0160 Tbilisi, Georgia. OPPA’s registered address is 15 Al. Kazbegi Ave., 0160 Tbilisi, Georgia.

The number of employees of OPPA as of 30 September 2022 and 31 December 2021 was 344 and 357, respectively.

ENERGO-PRO Bulgaria EAD (“EPB”)

EPB is a joint-stock company established on 13 September 2000. The identification number of the company is 130368870. With a total installed capacity of 166 MW, EPB is the largest private producer from hydropower sources in Bulgaria. Presently, EPB owns and operates fourteen HPPs. Ten of the plants are united in four cascades - Sandanska Bistritsa Cascade, Pirinska Bistritsa Cascade, Koprinka Cascade and Petrohan Cascade. The registered address of the company is Floor 5, 2 Pozitano Sq., p.b. 1000 Sofia, Bulgaria,

EPB is the parent company of the following entities:

Name	Location	EPB’s ownership interest	
		30 September 2022	31 December 2021
Pirinska Bistritsa Energia AD	Bulgaria	100%	100%

Pirinska Bistritsa Energia AD (“PBE”) is duly registered by the Sofia City Court under company file No 10295/2000 with seat 2 Pozitano square, floor. 5, 1000 Sofia, Bulgaria, re-registered with the Commercial register of the Registry Agency. Its main activity is study, design, and construction, funding and operation of hydro power plants. PBE is licensed by the State Energy and Water Regulatory Commission. PBE is the owner of two HPPs, united in one cascade. The plants are in the village of Gorno Spanchevo, close to the village of Pirin.

The number of employees of EPB as of 30 September 2022 and 31 December 2021 was 114 and 127, respectively.

ENERGO-PRO VARNA EAD (“EPV”)

EPV was registered on 12 June 2012 in the Trade register to Registration Agency with UIK 202104220 and permanent address Varna, Varna Towers – E, 258 “Vladislav Varnenchik” Blvd. On 5 July 2016, the parent company ENERGO-PRO VARNA EOOD has been transformed by changing the legal form into a single-shareholder joint-stock company (ENERGO-PRO Varna EAD) on the grounds of Art. 264, para. 1 of the Commerce Act with UIC 204146759. After the transformation, the registered capital of the company is in the amount of BGN 35,791,888 (18,300,102 EUR) divided into 35,791,888 ordinary dematerialized shares with a nominal value of BGN 1.

EPV is the parent company of the following entities:

Name	Location	EPV’s ownership interest	
		30 September 2022	31 December 2021
Electrodistribution North AD	Bulgaria	93.10%	93.10%

Berta Enerji Elektrik Üretim Sanay ve Tic. A.Ş. (“Berta”)

Berta is a joint-stock company established on 11 May 2016 in Turkey. The registered address of the company is Besa Kule, Çukurambar Mahallesi 1480. Sokak No:2/12 Çankaya / Ankara, Turkey. The main activity of Berta is the greenfield assets project of 3 HPP’s and dam development in Turkey on the river Berta.

PT ENERGO PRO Indonesia (“EP Indonesia”)

EP Indonesia is a joint-stock company established on 15 August 2018 with registered address of Jl. Raya Karang Congok No. 8 Kel. Karang Satria, Indonesia. The company’s main activity is investigation of the new hydropower project possibilities in the territory. As of 31 December 2021, and 30 September 2022, DKHI owns 95% of ownership and PT Solusi Global Sejahtera owns 5% of ownership.

ENERGO-PRO Green Finance s.r.o. (“EPGF”)

EPGF is a limited liability company established on 3 August 2020. The registered address of the Company is Na poříčí 1079/3a, Nové Město, 110 00 Praha 1, Czech Republic, identification number of the EPGF is 09385801. The main activity of EPGF is the issuance and management of bonds. These bonds are registered on the Prague Stock Exchange.

Terestra-Bulgaria EOOD (“Terestra”)

Terestra is a limited liability company established in 2002 under the Bulgarian legislation. The registered seat and the address of the company is at 100, G.S.Rakovski street, Sofia, Bulgaria.

Terestra is the parent company in the following entity:

Name	Location	Taurus’s ownership interest	
		30 September 2022	31 December 2021
Taurus Consult EOOD	Bulgaria	100%	100%

Taurus Consult EOOD (“Taurus Consult”) is a joint stock company established on 14 November 2013 in Bulgaria. The registered address of the company is at Sredets district, Georgi Sava Rakovski street, 100, floor 3., Sofia, Bulgaria.

TAKEDAKODON, s.r.o. (“Takedakodon”)

Takedakodon is a limited liability company established on 28 January 2013 with registered address of Na poříčí 1079/3, Nové Město, 110 00 Praha 1, Czech Republic.

2. Summary of Significant Accounting Policies

Basis of preparation. These condensed consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting (“IAS 34”) for the period of the nine months ended 30 September 2022 for ENERGO-PRO a.s. and its subsidiaries (together referred to as the “Group”). These condensed consolidated interim financial statements have been prepared under the historical cost convention.

The preparation of the consolidated financial statements in compliance with IFRS requires implementation of concrete accounting estimates. It also requires that the Management use its own assessment during the implementation of the Group’s accounting policies. The elements of the financial statements, whose presentation includes higher-degree subjective assessment or complexity, as well as those elements, for which the suppositions and estimations have a considerable impact on the financial statements as a whole, are separately disclosed in Note 3.

Management of the Group has complied with all standards and interpretations that are applicable to its activities and officially adopted for use by the EU at the date of preparation of these financial statements.

Management has reviewed the enforced from 1 January 2021 changes to the existing accounting standards and believes that they do not require significant changes to the application in the current year accounting policy.

Going concern. The condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Group will continue in operational existence for the foreseeable future. The future viability of the Group depends upon the business environment.

The Management has no plans or intentions to dispose of the business or cease operations that may materially alter the carrying value or classification of assets and liabilities reflected in the financial statements.

The future financial results of the group depend on the wider economic environment in which it operates. Factors that specifically affect the results of the Group, include flat or negative economic growth, prices of electricity and

others. The COVID-19 pandemic and the military conflict between Russia and Ukraine have heightened the inherent uncertainty in the Group's assessment of these factors.

The Management has performed an analysis of the effects of the COVID - 19 pandemic and the military conflict between Russia and Ukraine, including the expected consequences, risks and uncertainties and an assessment of the financial effects, as well as management's plans and intentions for social and economic measures to reduce the impact of the pandemic.

The Management has concluded that there are no material uncertainties that may cast significant doubt in the Group's ability to continue to operate as a going concern and thus it is appropriate to prepare the financial statements on a going concern basis.

Military conflict between Russia and Ukraine

On 24 February 2022, Russian Federation launched a large-scale military invasion of Ukraine. Since the start of the war, there has been a significant depreciation of the Russian Ruble against foreign currencies, as well as a significant decline in the value of Russian securities. The sanctions have led to substantial increases in the prices of commodities, such as energy, metals and food in global markets, and to further disruptions in global supply chains. Free market prices of electricity have also risen sharply.

The Group does not have direct exposures to related parties and/or key customers or suppliers from those countries. The Group regards these events as non-adjusting events after the reporting period, the quantitative effect of which cannot be estimated at the moment with a sufficient degree of confidence. The Group's management considered the potential effects of the invasion on its activities and business and concluded that there is no material effect given that the Group has insignificant relations with these countries.

Consolidated financial statements. Subsidiaries are those companies and other entities (including special purpose entities) in which the Group a) has power over the investee, b) it is exposed, or has rights, to variable returns from its involvement with the investee and c) has the ability to use its power to affect its returns. All three of these criteria must be met for an investor to have control over an investee. Subsidiaries are consolidated from the date on which control is transferred to the Group (acquisition date) and are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest.

On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets. Goodwill is measured by deducting the net assets of the acquiree from the aggregate of the consideration transferred for the acquiree, the amount of non-controlling interest in the acquiree and fair value of an interest in the acquiree held immediately before the acquisition date. Any negative amount ("gain from a bargain purchase") is recognised in profit or loss, after management reassesses whether it identified all the assets acquired and all liabilities and contingent liabilities assumed and reviews appropriateness of their measurement.

The consideration transferred for the acquiree is measured at the fair value of the assets given up, equity instruments issued, and liabilities incurred or assumed, including fair value of assets or liabilities from contingent consideration arrangements but excludes acquisition related costs such as advisory, legal, valuation and similar professional services. Transaction costs incurred for issuing equity instruments are deducted from equity; transaction costs incurred for issuing debt are deducted from its carrying amount and all other transaction costs associated with the acquisition are expensed.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated; unrealised losses are also eliminated unless the cost cannot be recovered. The Group and all of its subsidiaries use uniform accounting policies consistent with the Group's policies.

Non-controlling interest is that part of the net results and of the equity of a subsidiary attributable to interests which are not owned, directly or indirectly, by the Group. Non-controlling interest forms a separate component of the Group's equity.

For Business combinations between entities under common control and also for related contingent consideration from acquisitions under common control, the IAS 37 was applied to measurement and recognition of the contingent consideration.

Application of IAS 29. IAS 29 requires the non-monetary assets and liabilities and income statements of countries with hyperinflationary economies to be restated to reflect the changes in the general purchasing power of their functional currency, thereby generating a profit or loss on the net monetary position which is recognized in net income within "Other financial income" or "Other financial expense". In accordance with the criteria set out in IAS 29, Turkey has been classified as a hyperinflationary economy since April 2022. The only entity within the Group to which IAS 29 is applicable as of 30 September 2022 is EPInsaat. In view of the contribution of EPInsaat to the activities of the Group, based on an external study, the Management of the Group has assessed and concluded that the impact of IAS 29 to be immaterial and the interim financial statements for the nine months ended, and as of 30 September 2022 have therefore not been applied.

Purchases and sales of non-controlling interests. The Group applies the economic entity model to account for transactions with owners of non-controlling interest. Any difference between the purchase consideration and the carrying amount of non-controlling interest acquired is recorded as a capital transaction directly in equity.

Transactions with non-controlling interests. The Group applies a policy of treating transactions with non-controlling interests as transactions with parties external to the Group. Disposals to minority interests result in gains and losses for the Group that are recorded in the equity, applying the economic entity approach. Purchases from minority interests result in gains and losses recorded in the equity, being the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary.

Investments in associate. The Group applies accounting for an associate according to IAS 28. The Group recognise an associate if it is an entity over which an investor has significant influence, being the power to participate in the financial and operating policy decisions of the investee (but not control or joint control), and investments in associates are accounted for using of the equity method. Under the equity method of accounting, an equity investment is initially recorded at cost and is subsequently adjusted to reflect the investor's share of the net profit or loss of the associate.

Disposals of subsidiaries. When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequent accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the EP Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are recycled to profit or loss.

Financial instruments - key measurement terms. Depending on their classification financial instruments are carried at fair value or amortised cost as described below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of fair value is price in an active market. An active market is one in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange or other institution and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Valuation techniques such as discounted cash flow models or models based on recent arm's length transactions or consideration of financial data of the investees are used to fair value certain financial instruments for which external market pricing information is not available. Valuation techniques may require assumptions not supported by observable market data. Disclosures are made in these financial statements if changing any such assumptions to a reasonably possible alternative would result in significantly different profit, income, total assets or total liabilities.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial instrument. An incremental cost is one that would not have been incurred if the transaction had not taken place. Transaction costs include fees and commissions paid to agents (including employees acting as selling agents), advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs.

Amortised cost is the amount at which the financial instrument was recognised at initial recognition less any principal repayments, plus accrued interest, and for financial assets less any allowances for expected impairment losses. Accrued interest includes amortisation of transaction costs deferred at initial recognition and of any premium or discount to maturity amount using the effective interest method. Accrued interest income and accrued interest expense, including both accrued coupon and amortised discount or premium (including fees deferred at origination, if any), are not presented separately and are included in the carrying values of related items in the statement of financial position.

The effective interest method is a method of allocating interest income or interest expense over the relevant period to achieve a constant periodic rate of interest (effective interest rate) on the carrying amount.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the gross carrying amount of the financial instrument. The effective interest rate discounts cash flows of variable interest instruments to the next interest re-pricing date except for the premium or discount which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument. The present value calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate.

Classification of financial assets. Financial assets are classified, at initial recognition, as subsequently measured at amortised cost. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the company's business model for managing them. The Company measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows

And

- The contractual terms of the financial asset give rise on specified dates to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

All financial instruments and operations performed by the company are pointed to collect contractual cash flows from sales of electricity. This is a main objective and a regular activity for the company. Historically, the company has never sold its financial instruments. Based on the past experience all financial assets are held in order to collect contractual cash flows and are classified into first business model – Held to collect (H2C).

The company's cash flows from trade and other receivables pass the SPPI test, because there are not any interest rates for these financial instruments. Issued loans also meet the criterion of solely payments of principal and interests, since all interest rates on issued loans are fixed.

Classification of financial liabilities. Financial liabilities have the following measurement categories: (a) held for trading which also includes financial derivatives and (b) other financial liabilities. Liabilities held for trading are carried at fair value with changes in value recognised in profit or loss for the year (as finance income or finance costs) in the period in which they arise. Other financial liabilities are carried at amortised cost.

Initial recognition and derecognition of financial instruments. A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

De-recognition of financial assets. The Group derecognises financial assets when (a) the assets are redeemed or the rights to cash flows from the assets otherwise expire or (b) the EP Group has transferred the rights to the cash flows from the financial assets or entered into a qualifying pass-through arrangement while (i) also transferring substantially all the risks and rewards of ownership of the assets or (ii) neither transferring nor retaining substantially all risks and rewards of ownership but not retaining control. Control is retained if the counterparty does not have the practical ability to sell the asset in its entirety to an unrelated third party without needing to impose additional restrictions on the sale.

Impairment of financial assets carried at amortised cost. IFRS 9 sets out two approaches for recognition of expected credit losses:

General approach:

- For financial instruments in respect of which the credit risk on a financial instrument has not increased significantly since initial recognition, the recognizes the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses;
- For financial instruments in respect of which the credit risk on a financial instrument has increased significantly since initial recognition, the recognised the loss allowance for that financial instrument at an amount equal to lifetime expected credit losses.

Simplified approach:

- For all financial instruments, the recognised loss allowance should equal to lifetime expected credit losses.

With respect to impairment of trade receivables, the Group has used a provision matrix as well as its accumulated experience of credit losses on trade receivables in order to estimate the approximate lifetime expected credit losses of the financial assets.

Future cash flows attributable to a group of financial assets that are collectively measured for impairment are determined on the basis of historical information relating to financial assets with credit risk characteristics similar to those of the group of financial assets.

Offsetting. Financial assets and liabilities are offset, and the net amount reported in the statement of financial position only when there is a legally enforceable right to offset the recognised amounts, and there is an intention to either settle on a net basis, or to realise the asset and settle the liability simultaneously.

Property, plant and equipment (“PPE”). Property, plant and equipment are stated at cost, less accumulated depreciation and provision for impairment, where required.

Costs of minor repairs and day-to-day maintenance are expensed when incurred. Cost of replacing major parts or components of property, plant and equipment items are capitalised and the replaced part is derecognised.

At the end of each reporting period management assesses whether there is any indication of impairment of property, plant and equipment. If any such indication exists, management estimates the recoverable amount, which is determined as the higher of an asset’s fair value less costs to sell and its value in use. The carrying amount is reduced to the recoverable amount and the impairment loss is recognised in profit or loss for the year. An impairment loss recognised for an asset in prior years is reversed where appropriate if there has been a change in the estimates used to determine the asset’s value in use or fair value less costs to sell.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are recognised in profit or loss for the year within other operating income or expenses.

Depreciation. Land is not depreciated. Depreciation on other items of property, plant and equipment is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives:

	Useful lives in years
Land and buildings	20 – 100
Technical plant and machinery	25 – 45
Other plants, furniture and fixtures	3 – 6
Other fixed assets	5 – 25

The residual value of an asset is the estimated amount that the EP Group would currently obtain from disposal of the asset less the estimated costs of disposal, if the asset was already of the age and in the condition expected at the end of its useful life. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Leases. The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group as a lessee. The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets. The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follow:

	Useful lives in years
Land and buildings	20 – 100
Technical plant and machinery	25 – 45
Other plants, furniture and fixtures	3 – 6
Other fixed assets	5 – 25

If ownership of the leased asset transfers to The Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

Lease liabilities. At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by The Group and payments of penalties for terminating the lease, if the lease term reflects The Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, The Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases and leases of low-value assets. The Group applies the short-term lease recognition exemption to its short-term leases of land and buildings and technical plant and machinery (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

Group as a lessor. Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating

nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases previously accounted for as operating leases

The Group recognised right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases and leases of low-value assets. The right-of-use assets for most leases were recognised based on the carrying amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application/based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognised. Lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

The Group also applied the available practical expedients wherein it:

- Used a single discount rate to a portfolio of leases with reasonably similar characteristics
- Relied on its assessment of whether leases are onerous immediately before the date of initial application
- Applied the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application
- Used hindsight in determining the lease term where the contract contained options to extend or terminate the lease

IFRS 16 was adopted by the EU on 31 October 2017 and enters into force on 1 January 2019. The Group has applied a simplified retrospective approach without adjustments for prior periods. As the Group has operating leases, in the capacity of a lessee, in connection with IFRS 16, as of 30 September 2022, the Group reported right of use assets in the amount of EUR 8,534 thousand (31 December 2021: EUR 7,446 thousand). An average interest rate of 4.68% was used for the calculation.

The Group does not present lease liabilities separately in the statement of financial position, the lease liabilities are disclosed in the following notes of these in the statement of financial position include those liabilities:

(EUR'000)	30 September 2022	31 December 2021
Non-current financial liabilities	1,495	2,209
Other current liabilities	460	325
Total lease liabilities	1,955	2,534

Goodwill. Goodwill is carried at cost less accumulated impairment losses, if any. The Group tests goodwill for impairment at least annually and whenever there are indications that goodwill may be impaired. Goodwill is allocated to the cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the business combination. Such units or groups of units represent the lowest level at which the Group monitors goodwill.

Gains or losses on disposal of an operation within a cash generating unit to which goodwill has been allocated include the carrying amount of goodwill associated with the operation disposed of, generally measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit which is retained.

Intangible assets ("IA"). The Group's intangible assets other than goodwill have definite useful lives and primarily include electricity generation licenses acquired in business combinations. Acquired computer software is capitalised based on the costs incurred to acquire and bring it to use.

Development costs that are directly associated with identifiable and unique software controlled by the Group are recorded as intangible assets if an inflow of incremental economic benefits exceeding costs is probable.

Capitalised costs include staff costs of the software development team and an appropriate portion of relevant overheads.

All other costs associated with computer software, e.g., its maintenance, are expensed when incurred.

Intangible assets are amortised using the straight-line method over their useful lives:

	Useful lives in years
Electricity generation licenses	10 – 45 years
Customer lists	10 years
Software licenses and software	1 – 7 years
Other operating licenses	3 – 7 years

If impaired, the carrying amount of intangible assets is written down to the higher of value in use and fair value less costs to sell.

Income taxes. Income taxes have been provided for in the financial statements in accordance with legislation enacted or substantively enacted by the end of the reporting period with respect to tax law of each consolidated entity. The income tax charge comprises current tax and deferred tax and is recognised in profit or loss for the year except if it is recognised in other comprehensive income or directly in equity because it relates to transactions that are also recognised, in the same or a different period, in other comprehensive income or directly in equity.

Current tax is the amount expected to be paid to, or recovered from, the taxation authorities in respect of taxable profits or losses for the current and prior periods. Taxable profits or losses are based on estimates if financial statements are authorised prior to filing relevant tax returns. Taxes other than on income are recorded within operating expenses. The Group's liability for current tax is calculated as a sum of tax liability of each consolidated entity.

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. In accordance with the initial recognition exemption, deferred taxes are not recorded as temporary differences in a transaction other than a business combination if the transaction, when initially recorded, affects neither accounting nor taxable profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill. Deferred tax balances are measured at tax rates enacted or substantively enacted at the end of the reporting period which are expected to apply to the period when the temporary differences will reverse, or the tax loss carry forwards will be utilised. Deferred tax assets and liabilities are netted only within the individual companies of the Group. Deferred tax assets for deductible temporary differences and tax loss carry forwards are recorded only to the extent that it is probable that future taxable profit will be available against which the deductions can be utilised.

The Group controls the reversal of temporary differences relating to taxes chargeable on dividends from subsidiaries or on gains upon their disposal. The Group does not recognise deferred tax liabilities on such temporary differences except to the extent that management expects the temporary differences to reverse in the foreseeable future.

Uncertain tax positions. The Group's uncertain tax positions are reassessed by management at the end of each reporting period. Liabilities are recorded for income tax positions that are determined by management as more likely than not to result in additional taxes being levied if the positions were to be challenged by the tax authorities. The assessment is based on the interpretation of tax laws that have been enacted or substantively enacted by the end of the reporting period, and any known court or other rulings on such issues. Liabilities for penalties, interest and taxes other than on income are recognised based on management's best estimate of the expenditure required to settle the obligations at the end of the reporting period.

Inventories. Inventories are valued at the lower of cost and net realisable value. Costs incurred in bringing each product to its present location and condition are accounted for, as follows:

- Raw materials: purchase cost on a first-in/first-out basis
- Finished goods and work in progress: cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs

Initial cost of inventories includes the transfer of gains and losses on qualifying cash flow hedges, recognised in OCI, in respect of the purchases of raw materials.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Trade and other receivables. Trade and other receivables are carried at amortised cost using the effective interest method. Trade receivables represent the unconditional right of the Group to consideration under contracts with customers and other counterparties, i.e. only the passage of time is required before payment of that consideration is due.

Contract asset is the right of the Group to consideration in exchange for the goods or services that it has transferred to the client, but which is not unconditional (accrual of receivables). If, by transferring the goods and / or services, the Group performs its obligation before the client pays the respective consideration and / or before the payment becomes due, the consideration (which is conditional) is recognised as a contract asset. The right to consideration is unconditional if the only condition for the payment to become due is the passage of a certain period of time. Applying a certain methodology, the Group reports as customer contract assets, the accrued amount of electricity volumes delivered to customers, which is not actually measured at the end of the reporting period. Contract assets are presented separately from Trade and other receivables.

Contract liabilities. The payments received by the client and / or the unconditional right to receive payment before the Group has performed its obligations under the contract are presented as contract liabilities. Contract liabilities are recognised as income when (or as) the Group meets its obligations to perform under the contract.

They are included in the group of current liabilities when their maturity is within 12 months and / or are from the normal cycle of the Group, and the rest - as non-current. Assets and liabilities arising from a single contract are presented net in the balance sheet, even if they result from different contractual obligations to perform. Contract liabilities are presented separately from Trade and other payables.

Subsequent to initial recognition, trade receivables are reviewed for impairment in accordance with the requirements of IFRS 9.

Prepayments. Prepayments are carried at cost less provision for impairment. A prepayment is classified as non-current when the goods or services relating to the prepayment are expected to be obtained after one year, or when the prepayment relates to an asset which will itself be classified as non-current upon initial recognition. Prepayments to acquire assets are transferred to the carrying amount of the asset once the Group has obtained control of the asset and it is probable that future economic benefits associated with the asset will flow to the Group.

Other prepayments are written off to profit or loss when the goods or services relating to the prepayments are received. If there is an indication that the assets, goods or services relating to a prepayment will not be received, the carrying value of the prepayment is written down accordingly and a corresponding impairment loss is recognised in profit or loss for the year.

Cash and cash equivalents. Cash and cash equivalents include cash in hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less. Cash and cash equivalents are carried at amortised cost using the effective interest method. Restricted balances are excluded from cash and cash equivalents for the purposes of the cash flow statement. Balances restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period are included in non-current assets. The assigned receivables that were subsequently reclassified as a provided loan are presented by the Group as a part of the cash-flow from investing activities.

Share capital. Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds. Any excess of the fair value of consideration received over the par value of shares issued is recorded as share premium in equity.

Dividends. Dividends are recorded as a liability and deducted from equity in the period in which they are declared and approved. Any dividends declared after the reporting period and before the financial statements are authorised for issue are disclosed in the subsequent events note.

Dividend distribution. The distribution of dividends is recognised as liability in the financial statements for the period in which it is approved by the shareholders of the Group.

Value added tax. Output value added tax related to sales is payable to tax authorities upon delivery of the goods to customers. Input VAT is generally recoverable against output VAT upon receipt of the VAT invoice. The tax authorities permit the settlement of VAT on a net basis. Where provision has been made for impairment of receivables, impairment loss is recorded for the gross amount of the debtor, including VAT.

Borrowings. Borrowings are carried at amortised cost using the effective interest method.

Capitalisation of borrowing costs. Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial time to get ready for intended use or sale (qualifying assets) are capitalised as part of the costs of those assets.

The commencement date for capitalisation is when (a) the Group incurs expenditures for the qualifying asset; (b) it incurs borrowing costs; and (c) it undertakes activities that are necessary to prepare the asset for its intended use or sale.

Capitalisation of borrowing costs continues up to the date when the assets are substantially ready for their use or sale.

The Group capitalises borrowing costs that could have been avoided if it had not made capital expenditure on qualifying assets. Borrowing costs capitalised are calculated at average funding cost on entity level (the weighted average interest cost is applied to the expenditures on the qualifying assets), except to the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset. Where this occurs, actual borrowing costs incurred less any investment income on the temporary investment of those borrowings are capitalised.

Provisions. Provisions are determined by the present value of expected costs to settle the obligation using a pre-tax rate that reflects the assessment of the current state of the market value of money and risks specific to the liability. Increases in allowance as a result of time are recognised as interest expense.

Trade and other payables. Trade payables are accrued when the counterparty performs its obligations under the contract and are carried at amortised cost using the effective interest method.

Government grants. Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received, and the Group will comply with all attached conditions. Government grants relating to the purchase of property, plant and equipment are deducted from the carrying amount of the subsidised items. Government grants relating to costs are deferred and recognised in profit or loss for the year over the period necessary to match them with the costs that they are intended to compensate.

Related parties. For the purposes of these financial statements all shareholders, their associated and subsidiary companies, managers and members of the management bodies, as well as their family members are treated as related parties. In the ordinary course of business the Group enters into related parties transactions. Detailed information for these transactions is presented in Note 6.

Foreign currency translation. The functional currency of each of the EP Group's consolidated entities is the currency of the primary economic environment in which the entity operates. The functional currency of the Company is the Czech Crown ("CZK") and the EP Group's presentation currency is the EURO ("EUR"). EUR as the presentation currency is used because Group operates mainly inside Europe and the results presented in EUR are more comprehensible for financial institutions and business partners.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities are translated into each entity's functional currency at the official exchange rate of the National Banks (NB) of the country where each entity operates at the respective end of the reporting period. Foreign exchange gains and losses resulting from the settlement of the transactions and from the translation of monetary assets and liabilities into each entity's functional currency at year-end official exchange rates of the NB are recognised in profit or loss. Translation at year-end rates does not apply to non-monetary items that are measured at historical cost. Non-monetary items measured at fair value in a foreign currency, including equity investments, are translated using the exchange rates at the date when the fair value was determined. Effects of exchange rate changes on non-monetary items measured at fair value in a foreign currency are recorded as part of the fair value gain or loss.

The currencies in which most of the transactions are denominated are:

EUR – Euro
CZK – Czech Crown
USD – US Dollar
BGN – Bulgarian Leva
GEL – Georgian Lari
TRY – Turkish Lira

Loans between group entities and related foreign exchange gains or losses are eliminated upon consolidation. However, where the loan is between group entities that have different functional currencies, the foreign exchange gain or loss cannot be eliminated in full and is recognised in the consolidated profit or loss.

The results and financial position of all the group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

Assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet; income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); equity is translated at the historical rate; and all resulting exchange differences are recognised in equity (translation reserve) and other comprehensive income.

When control over a foreign operation is lost, the exchange differences recognised previously in other comprehensive income are reclassified to profit or loss for the year as part of the gain or loss on disposal. On partial disposal of a subsidiary without loss of control, the related portion of accumulated currency translation differences is reclassified to non-controlling interest within equity.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

Rounding of amounts. All amounts disclosed in the financial statements and notes have been rounded off to the nearest thousand currency units unless otherwise stated.

Revenue recognition. Revenues include the fair value of consideration received or receivable payments or remuneration for goods and services sold in the normal course of business of the Group. Revenues were down from a net value-added tax.

IFRS 15 introduces the model of the 5 steps for revenue recognition, whereby the underlying principle is that revenue is recognised as a result of the transfer of the promised goods and services to the client to the extent that it reflects the remuneration, which the entity expects to have in return for those goods and services.

The Group bases its estimates on historical results, taking into account the type of customer, type of transaction and the specifics of each agreement.

The Group recognises revenue when the amount of revenue can be reliably measured; when it is probable that future economic benefits will flow to the entity; and when specific criteria have been met for each of the Group's activities, as described below.

(a) Revenue from sale of electricity

Domestic sale of electricity is recognised based on metered or estimated usage of power by customers and calculated according to the enacted tariffs. Export sale and transit of electricity is recognised based on metered transfer of power and calculated according to the contractual tariffs.

(b) Revenue from sales of services

Revenue from sales of services comprise of the following services:

- Connection fees - consists of charges received from customers and recognised immediately at the time of initial connection (without fixed period) to the electricity network system
- Other – such as charges to reconnect customers, checking of electrical devices and other.

Sales of other services are recognised when the service is rendered. The Group transfers control over the services over time and therefore satisfies the obligation to perform and recognises revenue over time.

Connection fees - specified

In respect with IFRS 15, the Group has reviewed the contracts concluded for connection of new customers to the electricity grid and considers that they are not in compliance with the IFRS 15 criteria for the transfer of control over services over the time and hence does not meet the obligation to implement and recognise revenue over time.

Regarding the relationship with customers under connection agreements, the Group's understanding is that the advance payment received from these customers represents the cash received and the corresponding contractual obligation, as defined in IFRS 15, and revenue is recognised after the specified obligation for execution is fulfilled.

(c) Revenue from sale of grid components for electricity distribution

Grid components in the electricity sale price defined by the Regulator comprise of transmission fee and access fee. Some of the entities in the Group operate the grid and provide distribution directly (distribution companies), other entities do not provide distribution but sale (trading companies) but charge the end customers with both fees for distribution and for the distributed energy.

Until initial application of IFRS 15, the revenues of grid components in the electricity sales price are recognised in profit and loss on monthly basis after the measurement of electricity used by clients.

IFRS 15 specifies that when another party is involved in providing goods or services to a customer, the entity should determine whether the other party is acting as a principal or as an agent. The principal controls the promised goods or services before they are transferred to the client.

IFRS 15 provides the following indications for the designation of an agent that is deemed not to control the goods or services before being transferred to the client.

When an entity acts as a principal, revenues are recognised as the gross amount of the consideration payable. By contrast, the agent only recognises a commission or a fee.

The Group concludes that these indicators provide further evidence that it does not control the specified goods before they are transferred to the customers. As part of reaching that conclusion, the Group considers the following indicator:

- the supplier is not primarily responsible for fulfilling the promise to provide the goods to the customer. The Group is neither obliged to provide the goods if the supplier fails to transfer the goods to the customer, nor responsible for the acceptability of the goods;
- the Group does not take inventory risk at any time before or after the goods are transferred to the customer. The Group does not commit itself to obtain the goods from the supplier before the goods are purchased by the customer and does not accept responsibility for any damaged or returned goods;
- the Group does not have discretion in establishing prices for the supplier's goods. The sales price is set by the supplier.

In respect to the IFRS 15, distribution companies of EPV who trade with electricity (ElectroNorth) have reviewed the contracts concluded for grid components – transmission, access fee, and consider that they are acting as an agent. From 1 January 2018, the Group does not report revenue and (costs) for grid components. In the case of EPGS, this revenue is reported due to the following main differences with Bulgaria in local legislation: (1) EPGS has a contract with the regulated customer; (2) the primary obligor towards the customer is the supply company EPGS.

d) Revenue from customer contracts

Revenues are broken down into operating and financial revenues. Revenue from contracts with customers is recognised in the income statement on the basis of the provisions of the individual sales contract with the customer upon transfer of control of the product and service to the customer in an amount that reflects compensation for which the company and the group considers eligible for such products and services.

A five-step model is used to recognise revenue from contracts with customers:

1. definition of the contract with the buyer,
2. definition of enforcement obligations in contracts,
3. determination of the transaction price,
4. the allocation of the transaction price to the enforcement obligations; and
5. recognition of revenue when the enforcement obligation is met.

Revenue is recognised when the company meets its enforcement obligation. This is when a company transfers control of a product or service to a customer. Control means that the customer can direct the use of the asset and receive all the significant benefits from the asset and can also prevent others from using and receiving the benefit from the asset.

The transfer of control may occur at a particular time or period. For contracts that are performed over a longer period of time, revenue is recognised gradually over the period of performance but only if one of the following criteria is met:

- the buyer simultaneously accepts and consumes the benefits of the company's implementation during the implementation itself
- the enterprise's performance creates or increases an asset (eg work in progress) that the customer controls during the creation or expansion
- the performance of the enterprise does not create an asset that the enterprise can use for other purposes and the enterprise has a recoverable right to payment for the performance completed so far.

If, in accordance with the above provisions, individual contracts / projects meet the condition of a specific product and the company, in case of termination of the contract by the buyer, is entitled to payment for work performed, which includes a reasonable profit, revenue under contracts with customers is recognised gradually (over time).

Gradual recognition of revenue is carried out at the stage of completion. The input method, which is based on the costs actually incurred in relation to the estimated costs of completing the project, is used to measure completion.

In all other cases, revenue is recognised immediately, ie upon delivery of the product or services provided, which represent the fulfillment of an individual enforcement obligation. The enforcement obligation is linked to the fulfillment of a milestone, which represents the deadline for the delivery of equipment or services provided, set by the buyer / investor.

(e) Interest income

Interest income is recognised on a time-proportion basis using the effective interest method.

Revenues from penalty interest for late payment of bills for electricity consumed is recognised at the time of payment of the principal.

(f) Financial income under a corporate guarantee contract

The Group classifies its receivable under a contract for the provision of corporate guarantees as a financial asset because a company from the Group has become a party to a contractual arrangement and as a consequence has the legal right to receive cash. The financial income under the corporate guarantee agreement is rescheduled for the entire term of the contract and subsequently recognised in profit and loss proportionally over time.

Barter transactions and mutual cancellations. A portion of sales and purchases are settled by mutual cancellations, barter or non-cash settlements. These transactions are generally in the form of direct settlements by dissimilar goods and services from the final customer (barter), cancellation of mutual balances or through a chain of non-cash transactions involving several companies.

Sales and purchases that are expected to be settled by mutual settlements, barter or other non-cash settlements are recognised based on management's estimate of the fair value to be received or given up in non-cash settlements. The fair value is determined with reference to observable market information.

Non-cash transactions have been excluded from the consolidated cash flow statement. Investing and financing activities and the total of operating activities represent actual cash flows.

Employee benefits. Wages, salaries, paid annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the year in which the associated services are rendered by the employees of the Group.

(a) Defined contribution retirement plan

The Group does not manage obligatory or voluntary pension funds. Payment of retirement pensions is an obligation of the countries where the Group operates. In accordance with statutory requirements, the Group pays personal income tax and social security contributions, as well as contributions to the pension funds governed by those countries. These expenses are recognised in profit or loss. Once such contributions are made, the Group has no further obligations.

(b) Defined benefit obligations

The valuation of the long-term payables to employees (a lump-sum paid upon retirement) is performed using the unit credit method. The valuation is performed by actuaries, as of the balance sheet date. The payable, recognised in the balance sheet represents the net present value of the payments, as well as any actuarial corrections and expenses for previous employment. The actuary gains and losses, resulting from practical adjustments and changes of the actuary suppositions, are recognised in Other comprehensive income.

Performance Measures of the Group. In order to ensure a fair presentation of the Group's operations, the Group uses Performance measures of the Group that are not defined in IFRS or in the Local Accounting GAAPs. The Performance measures of the Group are described below, including their definitions and how they are calculated. The Performance measures of the Group used are unchanged compared with earlier periods.

(a) Earnings before Interest, Taxes, Depreciation and Amortization (EBITDA)

EBITDA is specified as a non-gaap measure in these Consolidated financial statements (there is no IFRS standard for EBITDA specification). The Group considers EBITDA to be an important indicator of its economic performance. EBITDA is calculated as total revenues minus certain operating expenses, as shown in Consolidated Statement of Comprehensive Income.

3. Critical Accounting Estimates and Judgements in Applying Accounting Policies

The Group makes estimates and assumptions that affect the amounts recognised in the financial statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies.

Judgements that have the most significant effect on the amounts recognised in the financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Estimated impairment of goodwill. The Group tests goodwill for impairment at least annually. The recoverable amounts of cash-generating units have been determined based on value-in-use or fair value less cost to sell calculations.

Initial recognition of related party transactions. In the normal course of business, the Group enters into transactions with its related parties. Judgement is applied in determining if transactions are priced at market or non-market interest rates, where there is no active market for such transactions. The basis for judgement is pricing for similar types of transactions with unrelated parties and effective interest rate analyses. Terms and conditions of related party balances are disclosed in Note 6.

Revenue from sale of electricity. Revenue from sale of electricity is recognised in profit or loss on a monthly basis after measuring the electricity provided to the customers. As the energy meters reading may not be carried out for all customers covering exactly the calendar month, the Group makes the calculation to accrue the revenue

from energy supply for the period. Calculations consider past historical data about electricity supply and demand for the short term forecasted.

Impairment of accounts receivable. The Management has made an estimation of the volume and timing of expected future cash flows that relate to accounts receivable in the following groups: individually accounts, households and other small customers and receivables under litigation. Due to the inherent uncertainty in this assessment, actual results may differ from expected. The Group's management reviews the estimates from previous years and actual results of the previous year. With regard to the initial application of IFRS 9, the Group has used its accumulated experience of credit losses and has taken into account current conditions and forecasts to reliably estimate the expected credit losses on its trade receivables.

Impairment of inventories. Management has estimated the inventory impairment by comparing the carrying amount and their probable net realizable value in assessing the moral and technical obsolescence of inventory items. Due to the inherent uncertainty of this assessment, actual results may differ from expected. Management reviews the estimates from previous years and the actual results of the previous year.

Provisions. The Management uses significant accounting estimates and judgments in determining the amount of provisions.

(a) Grid access fee provision

The calculation of the provision is based on a methodology given by the Regulator, taking into account the estimated value of the respective assets and the electricity consumption of the supplied customers. It covers potential customer claims for compensations related to the past 3-year period.

There is uncertainty incorporated in the calculation of the grid fee provision about the number of customers that might claim this compensation and once claimed about the outcome of the court case. The Group has estimated for all facilities that it is aware they are in use, that it is more likely than not that the amounts will be claimed, and the customers will possibly win in court.

(b) Provision for legal claims

Management assesses the risk of Group's losing legal claims. The estimates are updated periodically to reflect changes in all legal claims and circumstances in regard with them.

(c) Provision for energy efficiency

EPV is on the list of obligated persons under the Energy Efficiency Act (EEA) and have individual goals for energy savings. The EPV recognises a provision in connection with its obligation to meet these individual objectives.

Determining the useful life of PPE. The Management reviews the useful life of tangible and intangible assets and its potential increase or decrease based on regular observations and assessments carried out by the technical team.

In accordance with the policy for impairment of non-financial assets, the Group annually assesses the indicators for impairment of PPE. The evaluation includes an analysis of external factors, financial indicators for the year and other activity-specific indicators. In the presence of PPE impairment indications, the Group performs an impairment test that includes the determination of the recoverable amount of cash-generating units (CGU), based on a calculation of their value in use.

Retirement benefit obligations. The present value of the retirement benefit obligations in income depends on several factors, which are defined on the basis of actuarial valuation, using different assessments such as number of salaries defined in Collective labour agreement, their increase and other. Estimates used to determine the net expense/ (income) for the benefits at retirement include the discount factor.

Any change in these estimates will affect the carrying amount of retirement benefits obligations. At the end of each year, the Group determines appropriate discount factor. This the interest rate should be used to determine the present value of estimated future outflows needed to meet the obligations of such benefits.

In determining the appropriate discount factor, the Group takes into account the rate of government bonds (GB) with 10-year maturity, issued by the local governments, denominated in the currency in which the income would be paid and terms to maturity similar to the terms of the obligations under the pension income. Since the average retirement term is longer than 10 years, the actuary provides an extrapolation of the data for the effective annual benefit of government bonds.

Leases. Determining the lease term of contracts with renewal and termination options – the Group as lessee

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has several lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation to the leased asset).

Leases - estimating the incremental borrowing rate. The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

4. Adoption of New or Revised Standards and Interpretations

The accounting policies adopted are consistent with those of the previous financial year except for the following IFRS amendments which have been adopted by the Group/Company as of 1 January 2022:

IFRS 3 Business Combinations; IAS 16 Property, Plant and Equipment; IAS 37 Provisions, Contingent Liabilities and Contingent Assets as well as Annual Improvements 2018-2020 (Amendments)

The amendments are effective for annual periods beginning on or after 1 January 2022 with earlier application permitted. The IASB has issued narrow-scope amendments to the IFRS Standards as follows:

- IFRS 3 Business Combinations (Amendments) update a reference in IFRS 3 to the Conceptual Framework for Financial Reporting without changing the accounting requirements for business combinations.
- IAS 16 Property, Plant and Equipment (Amendments) prohibit a company from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, a company recognizes such sales proceeds and related cost in profit or loss.
- IAS 37 Provisions, Contingent Liabilities and Contingent Assets (Amendments) specify which costs a company includes in determining the cost of fulfilling a contract for the purpose of assessing whether a contract is onerous.
- Annual Improvements 2018-2020 make minor amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 9 Financial Instruments, IAS 41 Agriculture and the Illustrative Examples accompanying IFRS 16 Leases

The amendments had no impact on the financial statements of the Group as of 30 September 2022.

IFRS 16 Leases-Covid 19 Related Rent Concessions beyond 30 June 2021 (Amendment)

The Amendment applies to annual reporting periods beginning on or after 1 April 2021, with earlier application permitted, including in financial statements not yet authorized for issue at the date the amendment is issued. In March 2021, the Board amended the conditions of the practical expedient in IFRS 16 that provides relief to lessees from applying the IFRS 16 guidance on lease modifications to rent concessions arising as a direct consequence of the covid-19 pandemic. Following the amendment, the practical expedient now applies to rent concessions for which any reduction in lease payments affects only payments originally due on or before 30 June 2022, provided the other conditions for applying the practical expedient are met.

The amendments had no impact on the financial statements of the Group as of 30 September 2022.

5. Balances and Transactions with Related Parties

Parties are generally considered to be related if the parties are under common control or if one party could control the other party or can exercise significant influence or joint control over the other party in making financial and operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

As at 30 September 2022, the outstanding balances with related parties were as follows:

(EUR'000)	Shareholders	Entities under common control (i)
Current portion of issued loans	-	20
Non-current portion of issued loans	371,351	19,942
<i>of which: Principal</i>	<i>311,547</i>	<i>15,904</i>
<i>of which: Interest</i>	<i>59,804</i>	<i>4,038</i>
Prepayments for property, plant and equipment	-	5,179
Non-current financial fixed assets	-	14,620
Trade and other receivables	651	50,249
Inventories	-	4,063
Other current assets	-	45
Other non-current liabilities	-	2,866
Trade and other payables	-	228
Other current liabilities	-	3,103

The income and expense items with related parties for the nine months ended 30 September 2022 were as follows:

(EUR'000)	Shareholders	Entities under common control (i)
Sales of electricity in local markets	-	259
Sales - services and other	9	10,796
Other income	-	76
Purchased power	-	140
Services expenses	-	(11)
Materials expenses	-	(1,881)
Other operating expenses	-	(130)
Interest income	11,231	1,724
Interest costs	-	4

(i) Entities under common control – “Related parties” section – sister companies or group of companies that do not form part of the ENERGO-PRO Group and their shareholder is the entity DK Holding Investments, s.r.o. and its owner.

As at 31 December 2021, the outstanding balances with related parties were as follows:

(EUR'000)	Shareholders	Entities under common control (i)
Current portion of issued loans	-	19
Non-current portion of issued loans	322,503	19,318
<i>of which: Principal</i>	<i>274,181</i>	<i>15,787</i>
<i>of which: Interest</i>	<i>48,322</i>	<i>3,531</i>
Prepayments for property, plant and equipment	-	4,043
Non-current financial fixed assets	-	11,761
Trade and other receivables	643	51,673
Inventories	-	5,564
Other current assets	-	382
Other non-current liabilities	-	3,273
Trade and other payables	-	489
Other current liabilities	-	1,644

The income and expense items with related parties for the year ended 31 December 2021 were as follows:

(EUR'000)	Shareholders	Entities under common control (i)
Sales of electricity in local markets	-	228
Sales - services and other	6	25,465
Other Income	-	282
Purchased power	-	83
Services expenses	-	13
Materials expenses	-	4,211
Other operating expenses	-	25
Interest income	13,951	2,657
Interest costs	-	1

(i) Entities under common control – “Related parties” section – sister companies or group of companies that do not form part of the ENERGO-PRO Group and their shareholder is the entity DK Holding Investments, s.r.o. and its owner.

6. Property, Plant and Equipment

Carrying amount of property, plant and equipment were as follows:

(EUR'000)	Land and Buildings	Technical plant and machinery	Other plant, furniture and fixtures	Assets under construction	Right of use	Other fixed assets	Total
Net book value							
31 December 2021	53,121	352,221	7,525	41,810	4,031	9,408	468,116
30 September 2022	76,830	419,785	13,568	81,060	3,943	7,746	602,932

Assets under construction include costs for distribution companies EPV and EPG for construction and connection of PPE from the investment program of the Group. Based on the review for impairment of PPE, the Group's management has not established indicators that the carrying amount of assets exceeds their recoverable amount.

Prepayments for property, plant and equipment in the amount of EUR 6,547 thousand as of 30 September 2022 (31 December 2021: EUR 4,661 thousand) are mainly linked to the rehabilitation and modernization of the distribution networks in EPG.

7. Goodwill

Movements in goodwill arising on the acquisition of subsidiaries and change in the exchange rate are stated below:

(EUR'000)	31 December 2021	Acquisitions / Disposals	Exchange differences	Impairment loss	30 September 2022
EPB	24,849	-	-	-	24,849
EPGG	19,681	-	5,412	-	25,093
EP Colombia	1,396	4,987	(103)	-	6,280
OPPA	5,836	-	-	-	5,836
RH	4,086	-	656	-	4,742
EPG	404	-	111	-	515
Carrying amount	56,252	4,987	6,076	-	67,315

For the period ended on 30 September 2022 no significant changes in Group's operating activity leading to impairment indications of goodwill arose.

8. Other Intangible Assets

The intangible assets were as follows:

(EUR'000)	Electricity generation licenses	Software	Other	Total
Net Book Value				
31 December 2021	18,440	2,395	964	21,799
30 September 2022	19,746	2,743	1,203	23,692

According to the provisions of IAS 36 Impairment of assets at the end of each reporting period impairment test is carried out as to establish whether there is any indication that an individual asset of the intangible assets may be impaired. If there is any indication that an asset may be impaired, recoverable amount and the impairment loss shall be estimated for the individual asset.

As of 31 December 2021, and 30 September 2022, no indicators have been established that the carrying amount of intangible assets exceeds their recoverable amount and as a result, no impairment loss has been recognised in the financial statements.

9. Non-current and Current Issued Loans

(EUR'000)	30 September 2022	31 December 2021
Non-current portion of issued loans:		
Shareholders - DKHI (i)	371,351	322,503
EP MVE	11,561	8,182
EPI	8,380	11,135
Total non-current portion of issued loans	391,292	341,820
Current portion of issued loans:		
Terestra Bulgaria EOOD	4,757	2,561
Taurus Konsult EOOD	886	780
EPI	20	19
Other	5	35
Total current portion of issued loans	5,668	3,395
Total issued loans	396,960	345,215

(i) Issued loans to parent company DKHI include a principal of EUR 311,547 thousand as of 30 September 2022 (31 December 2021: EUR 274,181 thousand).

Movements in issued loans were as follows:

(EUR'000)	1 January - 30 September 2022	1 January - 31 December 2021
At the beginning of the period	345,215	318,177
Interest income accrued during the year (+)	11,827	14,652
Loans issued during the year (+)	38,058	12,224
Principal repayments (-)	(28)	(1,435)
Interest received during the year (-)	-	(9)
Exchange rate difference	1,886	1,908
Other	2	(302)
At the end of the period	396,960	345,215

10. Non-current Financial Assets and Prepayments for an acquisition of investments

(EUR'000)	30 September 2022	31 December 2021
Receivable from Bilsev for corporate guarantee fee (i)	14,620	11,761
Investments Fund	2,019	1,154
Other	1,336	1,106
Total non-current financial assets	17,975	14,021

(i) EPas is a guarantor of a loan dated 29 June 2016 between Bilsev and AKBANK Tic A.S. ("Akbank") in the amount of USD 141,000 thousand. EPas is entitled to receive a guarantee fee of 2% p.a. of the guaranteed loan amount. On 18 February 2019, EPas signed Amended Finance Documents with respect to this facility. According to Amended Finance Documents, the total amount that may be claimed under the EPas guarantee is limited to USD 50,000 thousand. EPas classifies this receivable as a financial asset because EPas is a party to the contractual arrangement and therefore, has a legal right to receive cash. The EPas recognises this financial asset at fair value on initial recognition.

Prepayments for an acquisition of investments

In June 2021, EPV and Frisardi EOOD had concluded a Preliminary agreement for a transfer of real estate / investments in the amount of EUR 7.2 million. EPV had paid in advance the amount of EUR 6.1 million.

In February 2022, Frisardi EOOD has established a new company FreeSol EOOD through a non-monetary contribution and subject of activity: the real estate, which was concluded in the above Preliminary agreement. In March 2022, EPV and Frisardi EOOD have concluded a contract for the transfer of a 100% of FreeSol EOOD's shares. With this last contract, the prior obligations of the two companies to sign a final agreement have been executed.

11. Investments in associate

(EUR'000)	30 September 2022	31 December 2021
Purchase of 39.76% of the shares of Berta (i)	28,378	28,315
Total investments in associate	28,378	28,315

(i) In June 2017, EPV signed a contract for the purchase of 49% of the shares of Berta with DKHI in the amount of EUR 27,000 thousand (BGN 52,807 thousand). Pursuant to the agreement, EPV has made advance payment for the full amount. The transfer of 49% of Berta's capital will be made subject to the following conditions: 1. Issuance of a license for electricity production and 2. Obtaining approval by the Regulatory Council for the Energy Market in the Republic of Turkey.

On April 25, 2019, a license for electricity production was issued for a period of 49 years. On May 5, 2020, the Energy Market Regulatory Board of the Republic of Turkey approved the change in the capital structure of Berta. As both of the above conditions were met in 2020, in May 2020, the EPV acquired 30,919 shares or 49.00% of Berta's capital (TRY 63,100 million). On 25 October 2021, the General assembly of shareholders of Berta decided to increase Berta's share capital to TRY 77,766 million. EPV retained 30,919 shares or 39.76% of Berta's capital.

The associate requires the Group's consent to distribute its profits. The Group does not foresee giving such consent at the reporting date. The Group presents its non-controlling interest in Berta as an investment in an associate. The associate had no contingent liabilities or capital commitments as of 30 September 2022 and 31 December 2021.

As of 31 December 2021, the associate has the following results related to non-audited Statement of financial position items: Non-current assets: EUR 5,884 thousand; Current assets: EUR 871 thousand; Non-current liabilities: EUR 0 thousand; Current liabilities EUR 1,828 thousand; Equity: EUR 4,928 thousand.

For the twelve months ended 31 December 2021, the associate has the following results related to non-audited Statement of Comprehensive Income item represented by 39.76% portion of ownership of the Group (2020: 49.00%): Share of the Group on Loss before tax: EUR 193 thousand. As at 30 September 2022, the Group has a 39.76% portion ownership in the associate.

During the period of the nine months ended 30 September 2022, the associate's results and facts stated above did not change significantly compared to the twelve months ended 31 December 2021.

12. Inventories

(EUR'000)	30 September 2022	31 December 2021
Prepayments for inventories	7,001	8,343
Electrical equipment	4,797	4,292
Cables and wires	1,938	3,498
Spare parts	1,712	1,860
Inventory related to Paybox Installation	1,207	1,108
Tools and bolts	885	1,930
Scrap & Damaged Inventory	751	401
Other (i)	3,472	2,754
Total inventories	21,763	24,186

(i) The item Other is mainly related to Oil and lubricants, Overalls and special clothes and Other spare parts.

13. Trade and Other Receivables

(EUR'000)	30 September 2022	31 December 2021
Receivables from commercial sector	97,671	90,252
Receivables from households	37,168	35,726
Receivables from transmission	3,987	2,862
Other trade receivables	7,796	7,467
Less: provision for impairment	(10,859)	(10,307)
Total trade receivables	135,763	126,000
Guarantee deposits	9,213	21,052
Advance payments	378	1,172
Restricted bank deposit	214	464
Deposits granted	-	42
Other	79	213
Total trade and other receivables	145,647	148,943

Movements in the impairment provision for trade and other receivables are as follows:

(EUR'000)	1 January - 30 September 2022	1 January - 31 December 2021
Provision for impairment at the beginning of the period	10,307	11,404
Impairment charge	1,110	2,424
Reversal of impairment during the year	(1,213)	(2,755)
Amounts written off during the year as uncollectible	1	(1,116)
Exchange rate difference	654	350
Provision for impairment at the end of the period	10,859	10,307

Analysis by credit quality of trade receivables is as follows:

(EUR'000)	30 September 2022	31 December 2021
Total neither past due not impaired:	119,684	103,603
Past due but not impaired		
- less than 30 days overdue	4,748	6,538
- 31 to 90 days overdue	7,503	4,635
- 91 to 180 days overdue	204	6,162
- over 181 days overdue	3,624	5,062
Total past due not impaired	16,079	22,397
Past due and impaired		
- current and impaired	29	28
- less than 30 days overdue	376	200
- 31 to 90 days overdue	533	339
- 91 to 180 days overdue	520	517
- over 181 days overdue	9,401	9,223
Total past due and impaired	10,859	10,307
Less: provision for impairment	(10,859)	(10,307)
Total current trade receivables, net	135,763	126,000

14. Other Current Assets

(EUR'000)	30 September 2022	31 December 2021
Advance payments (i)	11,105	12,973
Compensation from Ministry of Energy (EPV) (ii)	4,793	11,019
VAT receivables	2,129	5,914
Prepaid insurance	1,469	1,363
Other	6,247	2,255
Total other current assets	25,743	33,524

(i) increase of advance payments to suppliers in EPV for the purchase of electricity.

(ii) The Council of Ministers decided on 30 December 2021 (Protocol No 893) to compensate in full the grid companies for the period 1 July 2021 – 31 December 2021. With Protocol No 92 / February 25, 2022, and Protocol No 202 / April 6, 2022, the Council of Ministers decided to extend the deadline for the full compensation of grid companies to 30 June 2022. For the period July-September 2022, grid companies are compensated under contract with the Energy System Security Fund (FSES). Receivable for compensation from FSES as at 30 September 2022 include receivable of Electrodistribution North amounting to EUR 2,646 thousand and receivable of ENERGO-PRO Energy Services amounting to EUR 2,147 thousand (31 December 2021: EUR 11,019 thousand for Electrodistribution North). For the period ended 30 September 2022, the Group reports the compensation from the Ministry of Energy/ Energy System Security Fund as a reduction in the technological losses in the amount of EUR 2,646 thousand (2021: EUR 11,019 thousand).

15. Current and Non-current Provisions

(EUR'000)	30 September 2022	31 December 2021
Non-current:		
Retirement benefits (c)	3,607	3,416
Grid access fee provision (a)	3,484	3,463
Other non-current provisions (d)	215	226
Total non-current provisions	7,306	7,105
Current:		
Legal claims (b) (i)	5,058	4,134
Retirement benefits (c)	644	498
Other current provisions (d)	1,418	1,386
Total non-current provisions	7,120	6,018
Total provisions	14,426	13,123

The movement of the provisions is as follows:

(EUR'000)	Grid access fee	Legal claims	Retirement benefits	Other	Total
As at 1 January 2022	3,463	4,134	3,914	1,612	13,123

As at 31 December 2021	3,463	4,134	3,914	1,612	13,123

(i) The amount represents the estimate of the potential legal fees that would be paid to third parties in case court cases are lost. These court cases are disputed receivables under protocols for theft of electricity and the Group experience with these indicates high probability of loss as well as history of payments of such amounts.

(a) Grid access fee provision

EPV

Following the provisions of art.117, para 7 of Energy act, a provision has been made in order to cover potential future losses from the obligation to compensate the owners of certain grid assets for using their facilities to supply other customers with electricity. The calculation of the provision is based on a methodology given by EWRC taking into account the estimated value of the respective assets and the electricity consumption of the supplied customers. The Group distributes electricity through its own and foreign facilities. It covers potential customer claims for compensations related to the three-year period.

(b) Provision for legal claims

The Group is exposed to risk of losing legal claims. The estimates are updated periodically to reflect changes in all legal claims and circumstances around them. The Group considers that as of 30 September 2022, it has sufficient financial resources to settle its obligations under provisioned lawsuits amounted to EUR 5,058 thousand.

(c) Retirement benefits

- Benefits at retirement for illness

Amounts represent EPV's obligation as an employer regarding the payment of retirement benefits for illness. EPV estimated the expected cost of accumulating compensated leaves as additional amount that EPV expects to pay as a result of the unused entitlement that has accrued at the balance sheet date.

The principal actuarial assumptions are as follows:

	30 September 2022	31 December 2021
Discount rate	0.6%	0.6%
Future salary increases	3.0%	3.0%

Rates of employee turnover and early illness retirement

To investigate better the dynamics of the employment leaves depending on the age, the employees are divided into five age groups. For each of the age group, the turnover of personnel in the last years from the previous years. Based on research experience and Group's confirmed assumptions, in the actuary model have been defined the following degrees of withdrawal. In the actuary model are determined early illness degrees, defined based on statistics from National Center of Health Information.

Personnel degree of withdrawal in age groups

Age group	Degree of withdrawal
18 – 30	12.0%
31 – 40	8.0%
41 – 50	5.0%
51 – 60	2.0%
Over 60	0.0%

Demographic assumptions about the future characteristics of employees

Mortality assumptions are prepared on basis of National Statistical Institute data on the total mortality of Group countries population for the period 2018 – 2020.

- Interest rate for determining the discount factor

For the purpose of discounting is used effective annual interest rate in the amount of 0.60% (2021: 0.60 %). It is based on the yield on government securities with a 10-year maturity in line with the recommendations of paragraph 83 of IAS 19. Given that the average time until retirement is more than 10 years, the actuary has determined the effective annual discount rate by extrapolation of the data for the effective annual yield of government bonds, following the regulations of paragraph 86 of IAS 19.

- Wage growth in the coming years

Assumptions about future wage growth in the Group are in accordance with the development plan of Group.

2022 – 3% compared to the level in 2021;
 2023 – 3% compared to the level in 2022;
 2024 and the following – 1% compared to the level in previous year.

(d) Provision for other obligations

- Provision for unused paid leaves

The provision represents the Group obligation as an employer for unused days of paid annual leave and include salary and social security and health insurance. The Group estimated the expected cost of accumulating compensated absences as the additional amount that the Group expects to pay as a result of the unused entitlement that has accrued to the balance sheet date.

- Construction subcontractors

During the year 2020, The Group used the services of several construction subcontractors. The Group identified the potential business issues with the potential financial impact. The Group recognised the provision in the amount of EUR 797 thousand as of 30 September 2022.

16. Current and Non-current Borrowings

Compliance with covenants. The Group is subject to certain covenants related to its borrowings. Non-compliance with such covenants may result in negative consequences for the Group including growth in the cost of borrowings and declaration of default. The Group was in compliance with the covenants as of 30 September 2022 and 31 December 2021.

(EUR'000)	30 September 2022	31 December 2021
Non-Current portion of borrowings:		
Issued Bonds (i)	690,567	256,145
DSK Bank EAD (iii)	-	12,461
TBC Bank Georgia	-	800
VTB Bank Georgia	-	89
Total non-current portion of borrowings	690,567	269,495
Current portion of borrowings:		
Issued Bonds (i)	10,514	369,703
KBC Bulgaria EAD (ii)	1,252	19,851
Unicredit Bulbank AD (iv)	-	13,857
TBC Bank Georgia	-	208
VTB Bank Georgia	-	3
Other	49	-
Total current portion of borrowings	11,815	403,622
Total borrowings	702,382	673,117

The EP Group does not apply hedge accounting and has not entered into any hedging arrangements in respect of its foreign currency obligations or interest rate exposures. Proceeds from borrowings and Repayment of borrowings, which are listed in the Consolidated Statement of Cash-flows, are represented by cash movements involving the drawdown of existing operating loans, operating loan balances and refinancing of operating loans within the existing year.

4% Notes due 2022

On 7 December 2017, the Company issued first Eurobonds (ISIN: XS1731657141) with a total face value of EUR 370 million, maturity of 5 years and a fixed coupon of 4% p.a. The bonds have been admitted to trading on the unregulated market of the Irish Stock Exchange (Euronext Dublin). The issue price of the bonds was 100% of the nominal value. The effective interest rate was calculated at 4.38%. The carrying value of these bonds as at 31 December 2021 was EUR 369,703 thousand. The bonds carry no pre-emption or exchange rights. The bonds are freely tradeable, and their transferability is not limited. On 4 February 2022, EPas issued bonds in the amount of USD 435 million (EUR 378 million) with a fixed coupon of 8.5 % p.a. due 2027. The proceeds of the issuance were used to repay 4% Notes due 2022 (including interest accrued thereon), to pay related fees and expenses, and to repay certain credit facilities.

8.5% Notes due 2027

On 4 February 2022, the Company issued bonds (ISIN: XS2412048550) with a total face value of USD 435 million (EUR 379 million – calculated using EUR/USD FX rate as of the bond issue date of 1.1478), maturity of 5 years and a fixed coupon of 8.5% p.a. The proceeds of the issuance were used to repay the Company's EUR 370 million bonds with a fixed coupon of 4% p.a. due 2022 (including interest accrued thereon), to pay related fees and expenses, and to repay certain credit facilities. The bonds have been admitted to trading on the unregulated market of the Irish Stock Exchange (Euronext Dublin). The issue price of the bonds was 100% of the nominal value. The effective interest rate was calculated at 8.97%. The carrying value of these bonds as at 30 September 2022 was EUR 447,363 thousand. The bonds carry no pre-emption or exchange rights. The bonds are freely tradeable, and their transferability is not limited. The Company has the right to repay the bonds before their scheduled maturity date. The guarantors of this bond are EPV, EPGH, EPG, EPGG, EPGS, EP Turkey Holding and RH.

4.5% Notes due 2024

On 4 May 2018, the Company issued second Eurobonds (ISIN: XS1816296062) with a total face value of EUR 250 million, maturity of 6 years and a fixed coupon of 4.5% p.a. The bonds have been admitted to trading on the unregulated market of the Irish Stock Exchange (Euronext Dublin). The issue price of the bonds 100% of nominal value. The effective interest rate was calculated at 4.74%. The carrying value of these bonds as at 30 September 2022 was EUR 253,718 thousand (EUR 256,145 thousand as at 31 December 2021). The bonds carry no pre-emption or exchange rights. The bonds are freely tradeable, and their transferability is not limited. The Company has the right to repay the bonds before their scheduled maturity date. The guarantors of this bond are EPV, EPG, EPGG and RH. The terms and conditions of the bonds (including a detailed description of all covenants) are available at the registered office of the Company and on its website (www.energo-pro.com/en/pro-investory).

The Company continuously reviews its funding and maturity profile and monitors the debt capital markets to ensure that it is well positioned for any refinancing opportunities, including for its 4.5% Notes due 2024.

(ii) KBC Bank Bulgaria EAD (former Raiffeisenbank EAD) (EPV)

Lender	Original currency	Interest rate	Facility type	Outstanding balance as at 30 September 2022 (EUR'000)	Final maturity date
KBC Bank Bulgaria EAD	BGN	Reference rate with 1.09 % mark-up, minimum 1.09 %	Overdraft	1,252	December 2022

In December 2021, ElectroNorth and KBC Bank Bulgaria EAD (former Raiffeisenbank EAD) signed a facility agreement with respect to a BGN 39,000 thousand loan (EUR 19,942 thousand). The facility was provided for general corporate purposes. On 14 October 2022, the credit limit was increased up to BGN 70,000 thousand (EUR 35,897 thousand) and the final maturity date was changed to 4 October 2023.

(iii) DSK Bank EAD (EPV)

Lender	Original currency	Interest rate	Facility type	Outstanding balance as at 30 September 2022 (EUR'000)	Final maturity date
DSK Bank EAD	BGN	1-month EURIBOR with 2.00% mark-up, minimum 1.10%	Overdraft	-	September 2023

On 20 April 2021, EPES and DSK Bank EAD signed a facility agreement with respect to a BGN 30,000 thousand (EUR 15,338 thousand) loan. As of 7 April 2022, the credit limit was increased up to BGN 85,000 thousand (EUR 43,460 thousand) and the interest rate was changed to 1-month EURIBOR with 2% mark-up. The facility was provided for general corporate purposes.

(iv) UniCredit Bulbank AD (EPV)

Lender	Original currency	Interest rate	Facility type	Outstanding balance as at 30 September 2022 (EUR'000)	Final maturity date
UniCredit Bulbank AD 1	BGN	Variable interest rate index equal to average deposit index 0.02% and mark-up 1.15%	Overdraft	-	July 2023
UniCredit Bulbank AD 2	BGN	Variable interest rate index equal to average deposit index 0.02% and mark-up 1.05%	Overdraft	-	July 2023

UniCredit Bulbank AD 1: On 29 April 2021, EPES and UniCredit Bulbank AD signed a facility agreement with respect to a BGN 45,000 thousand (EUR 23,008 thousand) loan. On 27 July 2022, the maturity date of the loan

was extended to 31 July 2023. The facility was provided for general corporate purposes. UniCredit Bulbank AD 2: On 22 April 2021, EPS and UniCredit Bulbank AD signed a facility agreement with respect to a BGN 15,000 thousand (EUR 7,669 thousand) loan. On 27 July 2022, the maturity date of the loan was extended to 31 July 2023. The facility was provided for general corporate purposes.

17. Finance Costs – Net

(EUR'000)	1 January - 30 September 2022	1 January - 30 September 2021
Net foreign exchange losses (i)	(60,676)	(4,212)
<i>of which: Unrealised net foreign exchange gains / (losses)</i>	(67,704)	7,412
<i>of which: Realised net foreign exchange gains / (losses)</i>	7,028	(11,624)
Interest expenses bonds	(34,730)	(21,007)
Prolongation fees on factored payables	(2,633)	(3,324)
Interest expense from bank borrowings	(393)	(558)
Interest expense on lease liabilities	(151)	(129)
Fee from loans and other	(57)	(37)
Other finance costs	(4,264)	(1,217)
Finance costs	(102,904)	(30,484)
Interest income on issued loans	11,827	10,916
Other financial income	2,310	2,458
Finance income	14,137	13,374
Net finance costs	(88,767)	(17,110)

(i) Net foreign exchange losses (mainly represented by unrealised net foreign exchange losses) are related to the issued bonds and the translation of foreign currency loans into the functional currency of the relevant entity at the FX at the end of the reporting period.

18. Contingencies and Commitments

a) Legal Proceedings

EPB

As at 30 September 2022, a legal claim for EUR 1,226 thousand related to liability - expenses for balancing power against the EPB was initiated from National Electricity Company EAD (“NEK EAD”) in 2017. This claim is contested by the EPB. The NEK’s claim was partially upheld for EUR 285 thousand as principal plus EUR 78 thousand interests by the 1st and 2nd instance courts. Both, EPB and NEK appealed before the Court of Cassations in 2021.

EPB is a defendant in legal case for payment of EUR 266 thousand for water supply to NEK EAD for the period of April -May 2016, initiated in 2019. The case was suspended and reopened in mid-2021.

EPB is plaintiff in 2 administrative cases:

- Against the Council of Ministers’ Regulation for water use before the Supreme administrative court. First instance.

Based on its own estimates and both internal and external professional advice, management is of the opinion that no material losses will be incurred in respect of claims in excess of provisions that have been made in these consolidated financial statements

EPV

In regard with the separation of EDC Gorna Oryahovitsa (former name of Electrodistribution North AD) and EDC Varna (former name of ENERGO-PRO Sales AD) from the National Electricity Company (NEC) in 2000, the Companies from the Group acquired certain land and buildings with insufficient ownership deeds. As at 30 September 2022, the Group’s net book value of such assets is EUR 671 thousand (31 December 2021: EUR 793 thousand). The Companies are in process of acquiring of the necessary title deeds. In these financial statements no current liabilities have been recognized in relation to these assets. Based on the information available the management is not able to estimate the amount of such liabilities as at the balance sheet date.

EPG

On May 2019 JSC Georgia Railway began to dispute against EPG about the lost interest income in the amount of EUR 553. According to the decision of the Tbilisi City Court of 23 July 2021, the plaintiff, in accordance with article 102 of the Code of Civil Procedure, failed to present evidence of damage in the form of unearned income, which is the basis for refusing to pay the disputed amount (EUR 553 thousand). On 26 August 2021 the decision was appealed by JSC Georgian Railway. Based on the EPG’s initial assessment it is only possible, but not probable, that the action will succeed. Accordingly, no provision for any liability has been made in these financial statements.

b) Tax legislation

Tax legislation is subject to varying interpretations, and changes, which can occur frequently in **Bulgaria**. Management’s interpretation of such legislation as applied to the transactions and activity of the Group may be challenged by the relevant authorities.

The tax authorities may be taking a more assertive and sophisticated approach in their interpretation of the legislation and tax examinations. Combined with a possible increase in tax collection efforts to respond to budget pressures, the above may lead to an increase in the level and frequency of scrutiny by the tax authorities. It is possible that transactions and activities that have not been challenged in the past may be challenged. As a result, significant additional taxes, penalties, and interest may be assessed.

The taxation system in **Georgia** is relatively new and is characterised by frequent changes in legislation, official pronouncements, and court decisions, which are often unclear, contradictory, and subject to varying interpretation by different tax authorities. Taxes are subject to review and investigation by a few government bodies, which have the authority to impose severe fines, penalties, and interest charges. Management believes that it has implemented internal controls to follow transfer pricing rules and principles (“TP legislation”). Given

that the practice of implementation of the Georgian transfer pricing rules has not yet developed, the impact of any challenge of the Group's transfer prices cannot be reliably estimated; however, it may be significant to the financial conditions and/or the overall operations of the Group.

These circumstances may create tax risks in Georgia that are substantially more significant than in many other countries. Management believes that it has provided adequately for tax liabilities based on its interpretations of applicable Georgian tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on this financial information, if the authorities were successful in enforcing their own interpretations, could be significant to the Group.

In **Turkish** direct taxation system, rights, burdens, ways of implementing mandates and carrying out duties along with principals of accrual are regulated by the Tax Procedure (TP) Law. This Law comprises procedural and formal provisions of all tax laws. Taxes, duties and charges, and the ones that belong to provincial private administrations and municipalities are within the scope of the Law. A corporate is a subject of income tax on its income and earnings. The rules concerning the taxation of corporations are contained in the Corporate Income Tax (CIT) based on the CIT Law introduced in 2006. The corporate tax is levied on the income and earnings derived by corporations and corporate bodies. In other words, the CIT Law sets provisions and rules applicable to the income resulted from the activities of corporations and corporate bodies. Management of the Group has no information for any circumstances which may lead to tax payables in excess of tax liabilities recognised.

c) Environmental matters

The enforcement of environmental regulation in each country where Group operates is evolving and the enforcement posture of government authorities is continually being reconsidered. The Group periodically evaluates its obligations under environmental regulations. As obligations are determined, they are recognised immediately. Potential liabilities, which might arise as a result of changes in existing regulations, civil litigation or legislation, cannot be estimated but could be material. In the current enforcement climate under existing legislation, management believes that there are no significant liabilities for environmental damage.

d) Contingent liabilities

EPas guarantee Bilsev

EPas has provided a guarantee and certain other undertakings to Akbank (Turkey) in connection with USD 141,000 thousand (EUR 144,645 thousand) loan to Bilsev for the construction of the Karakurt dam and related HPP. As of 30 September 2022, USD 113,348 thousand (EUR 116,278 thousand) was drawn under this facility. On 18 February 2019, EPas signed Amended Finance Documents with respect to this facility. According to Amended Finance Documents, the total amount that may be claimed under the EPas guarantee is limited to USD 50,000 thousand (EUR 51,293 thousand as of 30 September 2022).

EPas guarantee LE

EPas has issued a guarantee in favour of Komerčni banka a.s. in connection with CZK 20,000 thousand (EUR 815 thousand) revolving facility for Litostroj Engineering a.s. The guarantee is for 100% of the drawn amount as of 30 September 2022.

EPas guarantee LP Group

On 12 February 2020, EPas issued guarantees for the performance of manufacturing contracts carried out by LP in the amount of EUR 30,600 thousand as of 30 September 2022 (31 December 2021: EUR 7,136 thousand).

EPV

Unicredit Bulbank AD has issued in the name of EPES bank guarantees to various suppliers (IBEX EAD, ESO EAD) in the amount EUR 17,524 thousand as of 30 September 2022 (31 December 2021: 14,941 thousand).

RH

RH issued guarantee letters amounting to EUR 2,650 thousand as of 30 September 2022 (31 December 2021: EUR 585 thousand). Guarantee letters issued are mainly given to the EMRA, TEİAŞ and various electricity distribution institutions.

EPToptan

EPToptan issued guarantee letters amounting to EUR 984 thousand as of 30 September 2022 (31 December 2021: EUR 96 thousand). Guarantee letters issued are mainly given to the EMRA, TEİAŞ and various electricity distribution institutions.

EPGS

According to Georgian Electricity (capacity) Market Rules and letter from Electricity Market Operator (“ESCO”) Public/Universal services suppliers are obliged to issue bank guarantee in order to compensate guaranteed capacity fee, ESCO service fee and electricity balancing market price. On 30 March 2022, EP Georgia Supply JSC issued a guarantee to ESCO in amount of EUR 3,529 thousand (31 December 2021: EUR 5,986 thousand), which was increased to the amount of EUR 5,641 thousand as of 30 September 2022 and prolonged till 9 February 2023. Guarantee was taken from Georgian commercial bank.

e) Commitments

EPV

Purchase of energy facilities

According to paragraph 4 of Closing decrees of the Energy law the Group is required within 8 years as from the coming into force of the Energy Law to purchase energy facilities, comprising elements of the transportation or distribution network, owned by individuals or legal entities. The deadline for the purchase of energy facilities which are owned by users expired in December 2015.

Management has made an assessment of the fair value of energy facilities, which are owned by consumers, which as at 30 September 2022 amounted to EUR 8,502 thousand (31 December 2021: EUR 8,832 thousand). The Management is unable to predict when energy facilities that are not redeemed by 30 September 2022 will be purchased.

In 2021 a company from the Group has entered into connection agreements for 128 connection facilities (31 December 2020: 137 connection facilities) under which the counter party is obliged to build the facilities. The Group has committed to purchase these facilities after they have been finished. The Management of the company is not in a position to reliably assess these capital commitments as it does not have information on the expected value of the facilities to be built. The average value of the connected facilities for the period 2020 – 2021 is EUR 20 thousand (2019 – 2020 - EUR 20 thousand).

EPG & EPGG

Pursuant to the “Sale agreement of the assets of the hydro power plants and the electricity distribution companies” concluded between the Government of Georgia and EPG, EPGG has undertaken commitment to:

- Maintain 85% of the installed capacity of the purchased hydro power plants; and
- Procure provision of uninterrupted service to the respective customers.

In addition, EPG and EPGG has agreed to contribute an additional investment of:

- in rehabilitation of hydro power plants; and
- in the rehabilitation and modernisation of the distribution networks.

As of 30 September 2022, and 31 December 2021, EPG and EPGG was in compliance with the above undertaken commitments and made sufficient investments to be in compliance with the investment plan.

19. Financial Risk Management

The risk management function within the Group is carried out in respect of financial risks, operational risks and legal risks. Financial risk comprises market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. The primary objectives of the financial risk management function are to establish risk limits, and then ensure that exposure to risks stays within these limits. The operational and legal risk management functions are intended to ensure proper functioning of internal policies and procedures to minimise operational and legal risks.

Credit risk. Credit risk is the risk that a customer may default or not meet its obligations to the Group on a timely basis, leading to financial losses to the Group. The Group's principal financial assets are bank balances, cash, trade receivables and issued loans. The credit risk on liquid funds is limited because the counterparties are banks with positive credit ratings (A to B). Trade receivables include a large number of customers from various geographical and industry segments and Group considers the credit risk arising from the failure of one or more companies to pay as not significant, and within the manageable risk. The internal analysis of age structure of trade receivables shows no significant value of overdue receivables. For customers, the Group assesses the credit quality of the customers by assessing the financial position of the customers, past experiences and other factors as a part of its credit risk management program. As at 30 September 2022 and 31 December 2021, the Group is not exposed to credit risk to related parties

Market risk. The Group takes on exposure to market risks. Market risks arise from open positions in (a) foreign currencies and (b) interest bearing assets and liabilities, all of which are exposed to general and specific market movements. Management sets limits on the value of risk that may be accepted, which is monitored on a daily basis. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

Currency risk. Currency risk is the risk that the financial results of the Group will be adversely impacted by changes in exchange rates to which the Group is exposed. The Group undertakes certain transactions denominated in foreign currencies. The Group did not use in 2021 and the nine months of ended 30 September 2022 any derivatives to manage foreign currency risk exposure, at the same time the management of the Group is seeking to mitigate such risk by managing monetary assets and liabilities in foreign currencies at the Group level.

Interest rate risk. Interest rate risk is the risk that changes in floating interest rates will adversely impact the financial results of the Group. The Group does not use any derivatives to manage interest rate risk exposure, at the same time a certain proportion of the Group's financial assets and liabilities are at fixed rates and thus the risk is limited.

Liquidity risk. Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Group is exposed to daily calls on its available cash resources. Management monitors monthly rolling forecasts of the Group's cash flows.

The Group seeks to maintain a stable funding base primarily consisting of borrowings. The Group's liquidity portfolio comprises cash and cash equivalents. Management estimates that the liquidity portfolio of cash and bank deposits except for the restricted cash can be realised in cash within a day in order to meet unforeseen liquidity requirements.

Capital management. Capital management is performed by the owners of the Group based on their requirements with respect to optimal capital structure of the Group. The Group only manages its capital structure with respect to legal requirements in the jurisdictions where the Group operates.

Management considers equity as presented in these consolidated financial statements, excluding non-controlling interest, as the Group's capital.

Price risk. As the Group operates on a regulated market, the Management is not able to influence the decisions of regulatory authorities. For the companies of the Group operating in the free market, price risk is associated

with the ability to find new clients by securing normal profit transactions. The Management monitors and controls the prices at which electricity is supplied.

20. Fair Value of financial instruments

The Group has no financial instruments measured at fair value in the condensed consolidated statement of financial position. The fair value for the purposes of disclosure of the following financial instruments is assumed as reasonably close to their carrying value:

- Trade and other receivables;
- Cash and cash equivalents;
- Loans (except Issued bonds);
- Trade and other payables.

Issued bonds

The fair value of bonds is based on the quoted market price for the same or similar issues or on the current rates available for bonds with the same maturity profile.

Carrying amounts and estimated fair values of financial instruments as of 30 September 2022, are as follows:

(EUR'000)	Carrying amount (Note 16)	Fair Value	Interest	Total Fair Value
8.5% Notes due 2027	447,363	415,014	5,923	420,937
4.5% Notes due 2024	253,718	230,790	4,592	235,382
Total	701,081	645,804	10,515	656,319

Carrying amounts and estimated fair values of financial instruments as of 31 December 2021, are as follows:

(EUR'000)	Carrying amount (Note 17)	Fair Value	Interest	Total Fair Value
4% Notes due 2022	369,703	367,278	974	368,252
4.5% Notes due 2024	256,145	247,656	7,428	255,084
Total	625,848	614,934	8,402	623,336

Vlastimil Ouřada
Finance Director and Member of the Board of Directors
ENERGO-PRO a.s.

Report on Review of Interim Financial Information

To the Shareholders of ENERGO - PRO a.s.:

Introduction

We have reviewed the accompanying Condensed Consolidated Interim Financial Statements of ENERGO - PRO a.s. and its subsidiaries ("ENERGO - PRO Group"), which comprise the Condensed Consolidated Interim Statement of Financial Position as at 30 September 2022, and the related Condensed Consolidated Interim Statement of Comprehensive Income, Condensed Consolidated Interim Statement of Changes in Equity and Condensed Consolidated Interim Statement of Cash-Flows for the six-month period then ended, and a summary of significant accounting policies and other explanatory notes.

Management is responsible for the preparation and fair presentation of Condensed Consolidated Interim Financial Statements in accordance with International Financial Reporting Standard IAS 34 - Interim Financial Reporting as adopted by European Union ("IAS 34"). Our responsibility is to express a conclusion on the accompanying Condensed Consolidated Interim Financial Statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of Condensed Consolidated Interim Financial Statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these Condensed Consolidated Interim Financial Statements.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying Condensed Consolidated Interim Financial Statements of ENERGO - PRO Group are not prepared, in all material respects, in accordance with IAS 34.
